Type 2 Diabetes: The Signs

Type 2 diabetes is the most common type of diabetes among Aboriginal people. You can have diabetes without knowing it.

What should I look for?

- Being thirsty often
- Having to pee often
- Unusual weight gain or loss
- Getting tired often
- Blurry vision
- Getting infections often
- Cuts and bruises that won't heal
- Tingly or numb hands and feet
- Problems with erections

If you have any of these signs, see your local health care provider and get tested. Finding out early gives you a head start in living a healthy lifestyle.
